

- Develop Smart Contract - Solidity
 - Get random number and allocate groups and nodes
 - Verifier generate random key & encrypt
 - Verifiers send / receive keys
 - Leader create new block with encrypted group key
 - Node listen for new blocks and locate block that aims to it
 - Node decrypt key
 - Node create new block with decrypted key
- Frontend Development - React & Web3.js
 - Homepage with provider/verifier selection
 - login/register function
- Deployment
 - Deploy on Infura Sepolia testnet
 - Metamask
